

TWO-PARTIAL HIGH PRESSURE FILTER HOUSING FOR COLD WATER

Two-partial cold water housing specifically designed for use in high-pressure (up to 10 bar) water supply systems. Clear housing allows for easy examination of cartridge condition. In addition, housing series is equipped with pressure release valve, which enables discharging the air from the filter after each cartridge replacement.

FREE cartridge included!

For pressures up to 10 bar!

2 O-rings for leak-proof installation!

Stainless steel screws!

- **FREE filtration cartridge included!**
- High raw material quality
- Wrench and a mounting bracket included
- Inlet/Outlet sizes: 1/2", 3/4" and 1"
- Ability to connect housings and to choose variety of 10" cartridge configurations
- Available with pressure release valve

Technical Specifications:

Inlet water temperature:	2°C - 45°C
Inlet water pressure:	up to 10 bar
Dimensions (height x diameter):	333 mm x 116 mm
Adapter diameter:	1/2", 3/4", 1"
Cartridge dimensions:	9 7/8" x 2 1/2"
Housing raw material:	PET
Head raw material:	Polypropylene
Double O-ring:	EPDM
